**Towards
to a more
sustainable
future**

WHAT IS

BAGASSE?

Bagasse is a material which is made from crushed fiber residue from the stalks of sugar cane.

The material has remained as a surplus product of sugar production.

HOW TO RECYCLE BAGASSE PRODUCTS?

Bagasse products can be recycled as biowaste or in the compost.

The material biodegrades and composts in industrial conditions over a period of about 60-90 days

FROM FORESTS TO YOU

FOR BETTER TOMORROW

The material for our products comes from well-managed FSC-certified forests. We want the products we make to follow very closely the guidelines of sustainable development.

**BREAD BAG
THAT IS
100%
COMPOSTABLE**

The NoiBIO bread bags do not contain any plastic coating. The window is made of glassing paper, which also contains no plastic. It means that the bread bag is 100% compostable
